

Hotel Customer Experience & Feedback Analytics

Independent Portfolio Case Study | 2026

Dataset disclosure: Simulated data created for analytical practice. Not real hotel data.

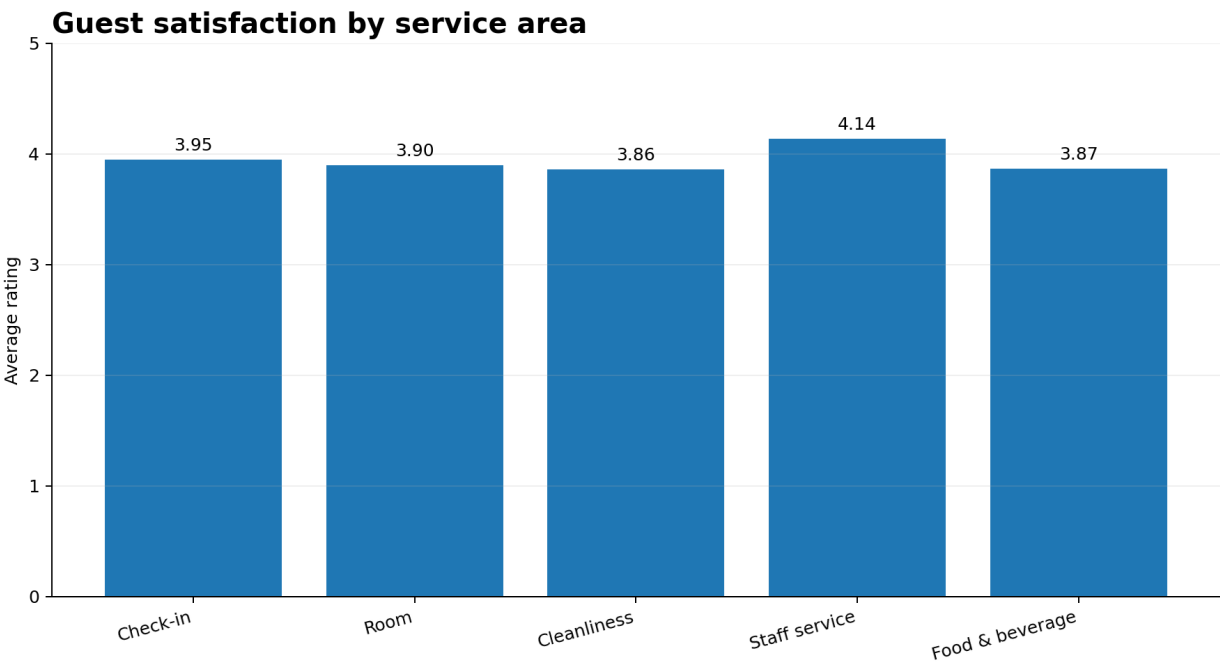

The business question

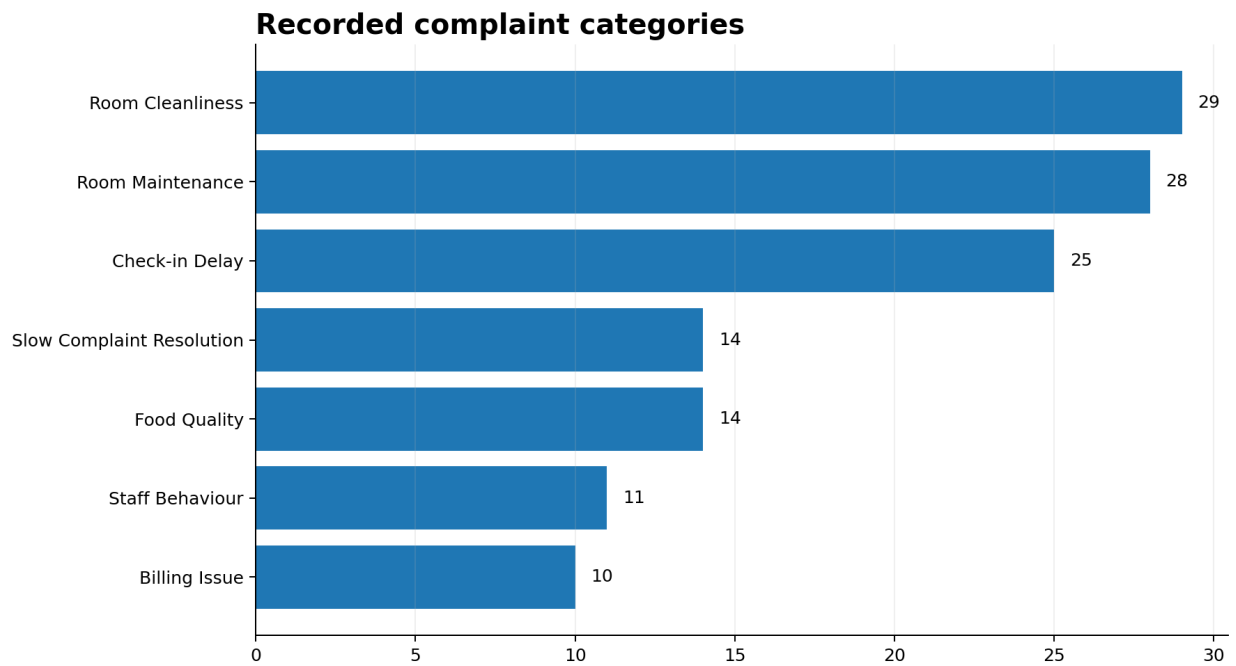

How can guest feedback be translated into a clearer view of service performance, recurring pain points and improvement priorities?

Project at a glance

Guest stays	286	Avg satisfaction	3.64/5
Complaint rate	45.8%	Resolution rate	74.8%
Avg resolution	6.5 hrs	Returning guests	36.4%

Analysis

Key findings

- Average satisfaction was 3.64/5.
- 45.8% of stays had a recorded complaint.
- Room Cleanliness was the most frequent complaint with 29 cases.
- Resolution rate was 74.8% and average resolution time was 6.5 hours.

Recommendations

1. Review recurring complaint categories weekly.
2. Assign clear ownership for repeated issues.
3. Separate unresolved from resolved complaints.
4. Monitor resolution time against an internal target.
5. Review service-area satisfaction monthly.
